

AIRPORT PAVEMENT MARKING

AirMark

Airfield-grade preformed thermoplastic. Non-runway airside.

Preformed thermoplastic engineered for airfield use — taxiways, ramps, aprons, gates, and vehicular airside roads. Retroreflective glass beads are embedded throughout the cross-section so visibility holds through the wear cycle. Designed to meet FAA Advisory Circular guidelines (AC 150/5340-1 series) and ICAO airfield-marking standards. Heat-applied by certified crews. Five standard colours: Red, White, Yellow, Black, Pink. Installation efficiency reduces taxiway-closure time vs. hand-painted multi-colour markings. NOT FOR...

USE ENVELOPE

Taxiways / ramps / aprons (non-runway)

MATERIAL

Preformed thermoplastic + glass beads

RETROREFLECTIVITY

Beads through full cross-section

COMPLIANCE

FAA AC 150/5340-1 series + ICAO

TAXIWAYS · APRONS · GATES · AIRSIDE ROADS
