

COLOURED PAVEMENT COATING

StreetBond

Waterborne epoxy-modified acrylic. Flexes with the pavement.

A high-performance two-component waterborne epoxy-modified acrylic coating engineered to turn asphalt or concrete into coloured, durable, slip-resistant surfaces. Spec the full system: water-based SB120 / SB150 / SB150 AL for the body of work; MMA-based Pro 220 / Pro 250 for cold-climate installation; concrete primers (solvent-based QS, waterborne WB) for substrate prep. 73+ standard colours plus custom matching. Documented long-life field performance: 10+ years on Beale Street (Memphis), 12+ years in Padua (Italy). Best...

CHEMISTRY

Waterborne epoxy-modified acrylic

VOC

< 50 g/L — well below SCAQMD Rule 1113

FRICTION (SB150 WET)

35–70 BPN (ASTM E303)

ADHESION

300–1,400 psi (ASTM D4541)
