

COLOURED LANE TREATMENT

MMAX

Traffic-ready overnight. Engineered for transit lanes.

MATERIAL

Methyl methacrylate (MMA) resin

CURE

45–60 min — traffic-ready

TRACTION

Embedded aggregate

MIN TEMP

+3°C and rising

MMA resin that cures to traffic-ready in 45–60 minutes, enabling complete overnight installation in active transit corridors without disrupting weekday operations. Embedded aggregates deliver superior traction under wet conditions. UV-stable pigments resist seasonal fading. Applies at +3°C and rising. The specification for red bus lanes, protected bike lanes, and BRT station zones where cure window and durability outlast painted and acrylic alternatives.

BUS LANES · BIKE LANES · CALMING · TRANSIT
