PRODUCT FLYER

AggreFill aggregate beside ChipFill chips

ASPHALT & CONCRETE REPAIR

AggreFill

Pre-coated aggregate for larger potholes.

Used with ChipFill, for potholes too deep or wide for ChipFill alone.

AggreFill is a pre-coated aggregate filler used with ChipFill to repair larger potholes: deep road failures, parking lot craters, industrial-site damage and utility cuts.

AggreFill fills the void and ChipFill bonds the aggregate and seals the repair flush. The system goes in cold and is finished with a heat torch, bonding to the surrounding asphalt or concrete. It can be installed year-round in any weather, and the lane reopens to traffic within minutes.

TYPE	Pre-coated aggregate, used with ChipFill
HOW IT GOES IN	Poured cold, finished with a torch and ChipFill
SURFACES	Asphalt and concrete
BEST FOR	Potholes too deep or wide for ChipFill alone
BACK IN SERVICE	Minutes
WEATHER	Any, year-round

DEEP ROAD FAILURES · PARKING LOT CRATERS · INDUSTRIAL SITES · UTILITY CUTS

HOW IT GOES IN

Fill, seal, heat

01

Fill

AggreFill fills the void in a pothole too deep or wide for ChipFill alone.

02

Seal

ChipFill goes on top, to bond the aggregate and seal the repair flush.

03

Heat

A heat torch finishes the repair, bonding it to the surrounding asphalt or concrete. The lane reopens within minutes.

FOR SMALLER REPAIRS

ChipFill on its own

ChipFill is thermoplastic in small chips, heated in place with a propane torch. On its own it repairs smaller potholes, cracks and joints.

WHERE IT GOES

Larger repairs

Roads	Deep road failures
Parking lots	Craters
Industrial sites	Site damage
Utility cuts
