

Harbour Passage, Saint John, New Brunswick

COATINGS

StreetBond

The colour.

A water-based, epoxy-modified acrylic pavement coating for asphalt and concrete, in 63 standard colours and full custom colour matching.

Designed to move with the pavement, avoiding the three failures of rigid coatings: cracking, premature wear, and being slippery in wet conditions. Sixty-three standard colours plus full custom colour matching.

It is the coating that colours every StreetPrint pattern, and on its own it turns parks, playgrounds, courts and area markings into surface colour. Easily refreshed: a worn surface is recoated, not rebuilt.

TYPE	Water-based, epoxy-modified acrylic
SURFACES	Asphalt and concrete
COLOURS	63 standard + custom matching
FLEXIBILITY	Moves with the pavement
SKID RESISTANCE	Meets ASTM E303
SERVICE LIFE	8+ years, easily refreshed

> "...the net result was a successful implementation and translation of our design ideas to the ground plane."
>
