COATINGS

StreetBondSR

Solar reflective coating.

Mitigating the urban heat island effect.

StreetBondSR is StreetBond formulated to reflect rather than absorb: the same flexible chemistry, made for cooler surfaces. Twelve colours carry an initial solar reflectance of 0.33 or higher and can contribute to the LEED v5 Sustainable Sites credit for heat island reduction (non-roof).

Dark pavement is one cause of the urban heat island, the measurable temperature difference between a city and the country around it. Applied to asphalt for parking, plazas, schools and LEED projects, StreetBondSR lowers surface temperature relative to dark pavement, with the durability and slip resistance of the StreetBond system.

TYPE	Solar reflective epoxy-modified acrylic
SOLAR REFLECTANCE	0.33 or higher, initial, 12 colours
LEED	v5 SS credit: heat island reduction (non-roof)
SURFACES	Asphalt
SERVICE LIFE	8+ years

PARKING · PLAZAS · LEED PROJECTS · SCHOOLS

COLOUR

Twelve colours at SR 0.33 or higher

SR Paprika SR 0.36	**SR Mustard** SR 0.41	**SR Sunbaked Clay** SR 0.45	**SR Evergreen** SR 0.33	**SR Brownstone** SR 0.33	**SR Khaki** SR 0.34
SR Fawn SR 0.33	**SR Sandstone** SR 0.37	**SR Irish Cream** SR 0.49	**SR Limestone** SR 0.34	**SR White** SR 0.77	**SR Mod Slate** SR 0.34

Solar reflectance from the 2026 StreetBond colour card. Swatches are indicative: request a physical sample for colour approval.

WHERE IT GOES

In the Product Portfolio Book

Sport courts	Solar reflective: cooler underfoot	p. 48
Play surfaces	Cooler underfoot in full sun	p. 58
Splash pads	SR 0.33 or higher, keeps surfaces cooler	p. 60
