PREFORMED THERMOPLASTICS

TrafficPatternsXD

For the toughest environments.

Aggregate-reinforced, preformed thermoplastic. Traffic tough, proven coast to coast.

The toughest material in the product range, built for performance in Canada. Proven in high traffic with concentrated wheel loads. High colour contrast for increased safety. Specified by Canadian transit authorities, municipalities and commercial stakeholders across Canada.

Each sheet is 150 mil of aggregate-reinforced preformed thermoplastic, with anti-skid aggregate rated 8–9 on the Mohs scale running through the full cross-section, so the grip lasts as long as the colour. It is heated on prepared asphalt and stamped through into the top of the asphalt, which is what makes it hold under plow blades, road salt and the freeze-thaw that follows.

THICKNESS	150 mil (3.8 mm)
AGGREGATE	8–9 Mohs, through the full cross-section
SKID RESISTANCE	60 BPN, ASTM E303
INSTALLATION	Heated and stamped into the asphalt
SURFACES	Asphalt
SERVICE LIFE	10+ years

> “The material provided us with continuity of design and less traffic disruption in construction than with replacing the pavers or demolishing the concrete base.”
>
> Al Ruggero, Project Manager with Emery Business BIA, on the Emery Village crosswalks in Toronto

CROSSWALKS · ENTRANCES · TRANSIT · STREETSCAPES

HOW IT GOES IN

Place. Heat. Stamp.

01

Place

Aggregate-reinforced, preformed thermoplastic panels are positioned precisely on the prepared surface.

02

Heat

Specialty heating equipment bonds the panels to the pavement, creating a skid-resistant surface.

03

Stamp

Place the desired template on the surface and vibrate the template into the melted surface, while keying into the asphalt below.

ON THE JOB

Plowed, salted and under heavy traffic

Woodbridge Avenue heritage crosswalks
Vaughan, Ontario
Product Portfolio Book, page 40

Bramalea Terminal crosswalk
Brampton, Ontario
Product Portfolio Book, page 47

Highway 7 VIVA rapidway
York Region, Ontario
Product Portfolio Book, page 53

COLOUR

Thirty-seven colours

Formulated for UV stability. Natural brick blends: Sand, Chestnut, Brick Red and Dark Red Brick. Physical samples available by request.

WHERE IT GOES

In the Product Portfolio Book

Crosswalks	150 mil, aggregate-reinforced	p. 46
Transit corridors	150 mil, aggregate-reinforced	p. 52
Traffic calming	Durable road surface treatments	p. 54
Pedestrian safety	Aggregate-reinforced, stamped surface	p. 62
Commercial spaces	The look of pavers, stones and cobbles	p. 72
Parking lots	High-traffic bays and crosswalks	p. 78

ON THE PRODUCT PAGE

- Technical specification (TS002)
- Specification: generic, branded and French
- Two-component sealer specification
- Colour guide
- Cross-section detail
- Design manual
