

CONCRETE & ASPHALT REPAIR

AggreFill

Pre-coated aggregate. Pairs with ChipFill for potholes up to 1 m².

A pre-coated aggregate filler — manufactured by Geveko Markings, distributed in Canada by HUBSS — used in combination with ChipFill to repair larger potholes up to approximately 1 m² in diameter. AggreFill provides the structural mass to fill the void; ChipFill bonds the aggregate matrix and seals the repaired surface. Cold-applied aggregate + heat-torch ChipFill matrix above — no hot-mix plant required. The combined AggreFill + ChipFill system is positioned by the manufacturer as a permanent repair, not a seasonal patch. Year-round,...

TYPE

Pre-coated aggregate filler

PAIRING

Used with Geveko ChipFill matrix

REPAIR SIZE

Up to ~1 m² in diameter

INSTALL

Cold aggregate + heat-torch ChipFill
