

## PAVEMENT MAINTENANCE COATING

# DuraShield

*Two-component asphalt maintenance coating. Solar Gray = SR 0.33.*

A two-component waterborne epoxy-modified acrylic pavement maintenance coating for asphalt — spray + back-roll applied. Same flexible epoxy-acrylic chemistry as StreetBond, scaled for parking-lot and residential-driveway economics. Specify in Asphalt (black) for restoration and protection, or Solar Gray for heat-mitigation projects (Solar Reflectance 0.33 initial). VOC < 50 g/L. Coverage approximately 65 ft<sup>2</sup>/gallon at 14-mil dry thickness in two layers. Install at 50°F (10°C) and rising — temperature must not drop below 50°F...

### CHEMISTRY

**Two-component waterborne epoxy-acrylic**

### VOLUME SOLIDS

**57 ± 2% (ASTM D2697)**

### SOLAR REFLECTANCE (SOLAR GRAY)

**0.33 initial**

### COVERAGE

**65 ft<sup>2</sup>/gal at 14 mil dry, 2 layers**
