

CONCRETE & ASPHALT REPAIR

Fast Patch DPR

Polymer-blend pavement repair. Back in service in under 45 minutes.

A polymer-blend pourable repair material — manufactured by The Willamette Valley Company (FastPatch Systems) and distributed in Canada by HUBSS. Engineered for high-strength, fast-return-to-service repair of potholes, spalls, joints, wheel paths, and utility cuts. Mixed with a cordless drill, poured into the defect, finished, and back in service in under 45 minutes. Up to 80% recycled and renewable polymer content, 100% solids. Completely odourless — suitable for indoor environments where ventilation rules out hot-mix or solvent-based...

TYPE

Polymer-blend distressed pavement repair

COMPOSITION

Up to 80% recycled, 100% solids

CURE AT 75°F (24°C)

1 hour

RETURN TO SERVICE

< 45 min (with accelerator)

POTHoles · SPALLS · WAREHOUSES · UTILITY CUTS
