

## SOLAR-REFLECTIVE COATING

# StreetBondSR

*Solar-reflective StreetBond. LEED v4 SSc7.1 — SRI  $\geq 29$ .*

The solar-reflective variant of StreetBond150 — same waterborne epoxy-modified acrylic chemistry paired with high-SRI pigment colourants that reduce surface temperature and mitigate urban heat island. Engineered specifically for LEED v4 Sustainable Sites Credit 7.1 (Heat Island Effect — Non-Roof). Limestone Grey delivers SRI 65 — far above the 29-point LEED threshold — and the 'Invisible Shade' colourant system pushes Solar Reflectance above 0.334 on darker tones too, so designs aren't restricted to white or light grey. ASTM E303...

### LEED METRIC

**SRI  $\geq 29$  (LEED v4 SSc7.1)**

### SRI (LIMESTONE GREY)

**65 — well above threshold**

### SOLAR REFLECTANCE

**$\geq 0.334$  with Invisible Shade**

### FRICTION (DRY / WET)

**81 / 77 BPN (ASTM E303)**
