

DECORATIVE PAVEMENT MARKING

TrafficPatterns

125-mil interconnected thermoplastic. Asphalt and concrete.

The standard-duty member of the TrafficPatterns family. Pre-cut interconnected sheets simulate pavers — no stamping templates or grids required, just surface-applied with infrared heat. Unlike XD, TrafficPatterns specifies on both asphalt AND Portland cement concrete (including green concrete that has set but not fully hardened) — a meaningful expansion of substrate options. Anti-skid aggregate at 8 Mohs minimum (harder than XD's 6 Mohs) is embedded through the full 125-mil cross-section. Specify TrafficPatterns for decorative...

THICKNESS

125 mil (3.18 mm) minimum

ANTI-SKID

≥ 8 Mohs aggregate, ≥ 30% intermix

SKID RESISTANCE

≥ 60 BPN (ASTM E303)

STATIC FRICTION

≥ 0.6 wet & dry (ASTM C1028 / D2047)
