PREFORMED THERMOPLASTICS

DecoMark

Custom graphics.

Preformed thermoplastic made to your vector artwork, for community identity, commemorative art, wayfinding and civic landmarks at street scale.

Factory fabricated to your vector artwork using HUB's colour palette, in standard and premium colours, then heat-applied to asphalt or concrete, where it bonds to the surface.

Crests, BIA marks, recognition markers and rail-safety reminders hold their contrast through freeze-thaw and plow seasons. Anti-skid aggregate runs through the material, so the grip lasts as the surface wears, and it does not alter the pavement underneath.

SYSTEM	Preformed thermoplastic
THICKNESS	125 mil (3.2 mm)
DESIGN	Vector artwork
COLOUR	Standard and premium options
INSTALLATION	Heat-applied, bonds to the surface
SURFACES	Asphalt and concrete

IDENTITY · WAYFINDING · PUBLIC ART · MEMORIAL

HOW IT GOES IN

Your artwork, made to last on the street

DecoMark is cut in the factory from your vector artwork. On site it is heat-applied to asphalt or concrete with a propane torch or an infrared heater, and it bonds to the surface without altering the pavement underneath.

ON THE JOB

Identity, memory and a safety message

Look Listen Live rail safety marking
Brantford, Ontario

Geary Avenue Park path
Toronto, Ontario
Product Portfolio Book, page 97

First Nations land recognition
Fort Langley, British Columbia
