

London, Ontario

COATINGS

MMAX

MMA area markings.

Red bus lanes, green bike lanes and transit priority lanes, traffic-ready in 45–60 minutes.

Methyl methacrylate allows for fast return to service, so an active corridor is installed with minimal community disruption. Available in 8 standard colours along with 15 premium colours.

MMAX is a methyl methacrylate (MMA) area marking: a two-part resin with hard aggregate and colourfast pigment. The aggregate gives it grip, and it goes down from +3°C and rising, which matters in a Canadian season.

MATERIAL	Methyl methacrylate (MMA) resin
CURE	45–60 min, traffic-ready
TRACTION	Embedded aggregate, skid-resistant
MIN. INSTALLATION TEMP.	+3°C
COLOURS	8 standard, 15 premium

BUS LANES · BIKE LANES · CALMING · TRANSIT

HOW IT GOES IN

Marked in one overnight closure

A two-part resin with hard aggregate and colourfast pigment, applied cold. It is traffic-ready in 45–60 minutes, so an active corridor can be marked in one overnight closure, from +3°C and rising.

ON THE JOB

Transit corridors in Ontario

East London Link rapid transit
London, Ontario
Product Portfolio Book, page 90

TTC bus priority corridors
Toronto, Ontario

COLOUR

Standard and premium colours

Eight standard and fifteen premium colours, each matched to its closest PMS reference. Premium colours carry a minimum order of 20 kits (40 gallons).

WHERE IT GOES

In the Product Portfolio Book

Bike lanes	Methyl methacrylate with corundum or sand	p. 50
Transit corridors	MMA resin: lane and area markings	p. 52
Pedestrian safety	MMA resin: 45–60 minute cure	p. 62
