PREFORMED THERMOPLASTICS

PreMark

Road marking symbols.

Arrows, stop bars, yield triangles, school legends, bike symbols and ladder lines, pre-cut to specification.

Heat-applied by torch: no stencils, no curing window, drive on immediately.

Integrated glass beads give the markings retroreflectivity, so they return a driver's headlights at night. PreMark is 125 mil as standard, with a 90 mil ViziGrip option, and its service life is 6–8 years.

MATERIAL	Preformed thermoplastic
THICKNESS	125 mil standard / 90 mil ViziGrip
INSTALLATION	Heat-applied, drive on immediately
RETROREFLECTIVITY	Integrated glass beads
SERVICE LIFE	6–8 years

BIKE LANES · CROSSWALKS · REGULATORY · PARKING

HOW IT GOES IN

Pre-cut, then heat-applied

Each symbol or legend arrives pre-cut to specification. On site it is heat-applied with a torch and bonds to the surface, and traffic drives on it immediately: no stencils and no curing window.

ON THE JOB

Symbols, legends and lines

A bike lane symbol going down
From HUB's PreMark photographs

Speed legends
Granville Island, Vancouver, British Columbia

LUNCH & LEARN

A Lunch & Learn on PreMark

Sixty minutes with your engineering, landscape architecture or planning team, in your office or online: the specification, the samples and your questions. Lunch is on us (a $25 voucher when the session is virtual), and nothing is invoiced.
