

CONCRETE & ASPHALT REPAIR

AggreFill

Pre-coated aggregate. Pairs with ChipFill for potholes up to 1 m².

A pre-coated aggregate filler — manufactured by Geveko Markings, distributed by HUBSS in Canada — used in combination with ChipFill to permanently repair larger potholes up to approximately 1 m² in diameter. AggreFill provides the structural mass to fill the void; ChipFill bonds the aggregate matrix and seals the repaired surface. The combined system is positioned as a permanent repair, not a seasonal patch. Year-round deployment, traffic-ready within minutes.

TYPE	PAIRING
Pre-coated aggregate filler	Used with Geveko ChipFill matrix
REPAIR SIZE	INSTALL
Up to ~1 m ² in diameter	Cold aggregate + heat-torch ChipFill
