

AIRPORT PAVEMENT MARKING

AirMark

Airfield-grade preformed thermoplastic. Non-runway airside.

Preformed thermoplastic pavement markings engineered for airfield use — taxiways, ramps, aprons, gates, and vehicular airside roads. Retroreflective glass beads embedded throughout the cross-section. Designed to meet FAA Advisory Circular guidelines (AC 150/5340-1 series) and ICAO standards. Withstands jet blast, snow clearing, rubber-removal treatments, and the daily operational demands of an active airfield. Five standard colours.

USE

Taxiways / ramps / aprons (NON-RUNWAY)

MATERIAL

Preformed thermoplastic + glass beads

COMPLIANCE

FAA AC 150/5340-1 + ICAO

MANUFACTURING

ISO 9001:2015 certified

TAXIWAYS · APRONS · GATES · AIRSIDE ROADS
