

PAVEMENT MAINTENANCE COATING

DuraShield

Two-component asphalt maintenance coating. Solar Gray option = SR 0.33.

A two-component waterborne epoxy-modified acrylic pavement maintenance coating, spray + back-roll applied to asphalt. Same flexible chemistry as StreetBond — moves with the pavement, will not peel. Used for parking lots, residential driveways, and pedestrian areas where colour, slip resistance, and chemical protection are required but heavy decorative finish isn't. Solar Gray variant carries Solar Reflectance of 0.33 for heat-mitigation projects.

CHEMISTRY

Two-component waterborne epoxy-acrylic

VOLUME SOLIDS

57 ± 2% per ASTM D2697

SOLAR REFLECTANCE (SOLAR GRAY)

0.33 initial

COVERAGE

65 ft²/gal at 14 mil dry, 2 layers

PARKING · DRIVEWAYS · PATHWAYS · LEED SITES
