

MMA COLOURED LANE TREATMENT

MMA[®]

Two-component MMA + corundum. Traffic-ready in 45 minutes.

A two-component methyl methacrylate resin coating with corundum aggregate (9 Mohs — hardest in the anti-skid lineup). Squeegee-, roller-, or spray-applied; cures via BPO catalyst added at installation. Traffic-ready in 30–60 minutes — typically 45 — enabling complete overnight installation in active corridors. Extended Season variant applies down to 35°F (2°C). EF Green meets FHWA chromaticity coordinates for bike-lane green.

CHEMISTRY

Two-component MMA + corundum

AGGREGATE

Corundum, 9 Mohs hardness

CURE TO TRAFFIC

30–60 min (≈ 45 typical)

INSTALL TEMP (EXT. SEASON)

35°F to 150°F (2°C to 66°C)

BUS LANES • BIKE LANES • BRT • TRANSIT
