

REGULATORY PAVEMENT MARKING

PreMark

Pre-cut regulatory thermoplastic. Lasts 6–8× longer than paint.

Pre-cut preformed thermoplastic regulatory pavement markings — arrows, stop bars, yield triangles, school-zone legends, bike pictograms, accessible parking symbols, crosswalk lines. Heat-applied with an industrial propane torch, no surface preheating, drive-on immediately. Four manufacturing finishes: BD (Beaded — full retroreflectivity), VG (ViziGrip — beads + anti-skid), NB (Non-Beaded), SK (Skid-Only). PreMarkXF cold-weather variant has no minimum temperature requirement. Made with up to 60% recycled material.

FINISHES

BD / VG / NB / SK

COLD-WEATHER VARIANT

PreMarkXF — no minimum temp

INSTALL

Industrial propane torch, drive-on

RECYCLED CONTENT

Up to 60%

ARROWS · STOP BARS · SCHOOL ZONES · ACCESSIBILITY
