

COLOURED PAVEMENT COATING

StreetBond

Waterborne epoxy-acrylic. Flexes with the pavement. Will not peel.

A high-performance two-component waterborne epoxy-modified acrylic coating that turns ordinary asphalt or concrete into coloured, durable, slip-resistant surfaces. The full system spans water-based variants (SB120 / SB150 / SB150 AL), MMA variants for cold-climate work (Pro 220 / Pro 250), and concrete primers. 73+ standard colours plus custom matching. ADA-compliant. Documented field performance of 10+ years (Beale Street, Memphis) and 12+ years (Padua, Italy).

CHEMISTRY

Waterborne epoxy-modified acrylic

VOC

< 50 g/L (water-based)

FRICTION (SB150 WET)

35–70 BPN per ASTM E303

ADHESION

300–1,400 psi per ASTM D4541
