

DECORATIVE PAVEMENT MARKING

TrafficPatterns

Standard-duty interconnected thermoplastic. Asphalt or concrete.

The standard-duty TrafficPatterns. Pre-cut interconnected sheets simulate pavers — no stamping templates or grids required. Installs on both asphalt and Portland cement concrete (including green concrete) — a key differentiator from TPXD. Anti-skid elements at 8 Mohs hardness, embedded through the full 125-mil cross-section. Surface-applied with infrared heat; open to traffic within minutes.

THICKNESS

125 mil (3.18 mm) minimum

ANTI-SKID

≥ 30% intermix, ≥ 8 Mohs

SKID RESISTANCE

≥ 60 BPN per ASTM E303

STATIC FRICTION

≥ 0.6 wet/dry per ASTM C1028
