

AIRFIELD PAVEMENT MARKING

AirMark

Airfield markings, certified to last.

Airfield markings are safety-critical. Precision, visibility, and permanence are not negotiable. AirMark preformed thermoplastic is engineered to airfield marking standards, delivering consistent dimensional accuracy, premium retroreflectivity through full-depth glass bead construction, and a service life that outlasts paint by four to one. Heat-applied by certified crews to asphalt and concrete airfield surfaces. The choice for airports and aerodrome operators who need markings that hold their specification year-round.

APPLICATION	MATERIAL
Non-runway airfield surfaces	Preformed thermoplastic
RETROREFLECTIVITY	SERVICE LIFE
Full-depth glass bead	4× painted alternatives
