

CONCRETE AND ASPHALT REPAIR

AggreFill

Pre-coated aggregate filler for larger potholes up to 1 m². Combined with ChipFill for permanent repair.

AggreFill is a pre-coated aggregate filler used in combination with ChipFill to permanently repair larger potholes — up to approximately 1 m² in diameter. Where the damage is too deep for a stand-alone material, AggreFill provides the structural mass to fill the void; ChipFill bonds the aggregate matrix and seals the surface. The combined system applies cold then receives a heat torch finish, bonding chemically to the surrounding...

TYPE

Pre-coated aggregate filler

APPLICATION

Cold aggregate + heat-torch ChipFill matrix

SUBSTRATE

Asphalt and concrete

REPAIR SIZE

Larger damages — up to ~1 m²

PARKING LOTS · DRIVEWAYS · PARKS & PATHS · COMMERCIAL · TOWNHOMES
